Project Summary

The idea of the Paul Cezanne web site is to showcase his works of art and to honor a man who was a fine arts genius. He often painted pictures of landscapes as well as portraits. This site is meant for researchers and the general public with interests in learning about Paul Cezanne.

Content:

- Home: main page featuring several thumbnails of his works
- Biography: a short, yet detailed, biography highlighting the life of Paul Cezanne, including a self portrait
- Time line: a brief list describing information of most important events in a chronological order based on time
- Gallery: series of four pages dedicated to the works of the artist. Each dedicated to a certain theme
- Contact: a page that gives information about the web designer

Design Summary

The overall design of the piece is meant to reflect the clean, contemporary style that would have mirrored Cezanne's work today. This accentuates the traditional work of the artist while not being too distracting. The two fonts chosen, Rage Italic and Arial Narrow, reinforce this idea. By choosing a traditional style for headers and a simple style for text it creates a nice counterbalance through out the page. The colors chosen, tan, dark brown, light brown, and a medium brown, it accentuates the colors that Cezanne often choose himself. Thus the colors complement each piece.

Audience Profile

Primary: people who are avid fans of Classic fine art, landscapes, and paintings

Secondary: those interesting in investigating the influences of Eugène Delacroix, Gustave Courbet and Edouard Manet.

Perception/Tone

Clean, Calm
